REGARDING COVID TESTING TO OUR GUESTS

Given the announcement of the Centers for Disease Control and Prevention (CDC) in the United States requesting a negative COVID test for all airway passengers entering the country, starting Jan. 26, 2021, and following our pledge to the safety of our visitors, we proudly announce that our hotels will provide a complimentary antigen testing - up to 2 guests per room, traveling to the USA, after staying a minimum of 3 nights with us. The test will be performed with the highest medical standard, same day results and without leaving our premises. In addition, for guests traveling to countries requiring a PCR testing instead, our concierge teams will help facilitate testing onsite through a third party service. Additional fees will apply.

From the very beginning of the current pandemic, our hotels have been leaders in ensuring our guests' wellbeing, procuring with both responsibility and commitment all the sanitary measures required by every stage of this global phenomenon, always going beyond the national requirements of biosecurity, firmly backed up by our Stay Safe&Clean© certification.

Furthermore, following the solidarity and great service that precedes us, should a guest test positive, we will provide an special rate for any 14 day quarantine stay sheltered under our care and hospitality.
